

Tabouret H30 perforé

Designed by Tolix®

The H30 perforated Stool is ideal for children and adults. Ideal as a seat or footstool for children, its resistance makes it possible to be used for the same functions by the older ones.

This new perforated version of the H30 stool gives it such elegance that it will also find its place as a decorative object in a room of the house to put a plant or to place a pile of books.
