

Galettes pour chaises*

Designed by Tolix®

*Seat cushions

Cushions for chairs and armchairs stay perfectly in place thanks to their black anti-slip underside. A technical composite material, Stamskin® offers exceptional resistance to all sources of deterioration: abrasion, rips, fire (M1 classification for PRN 92-507 standard), water, UV and even sunscreen thanks to its elastomer technology. It doesn't absorb heat and is always at a perfectly comfortable temperature. Alcantara® resists both UV rays and water and is soft to the touch, similar to suede.

- Available in 3 fabrics: Stamskin, Alcantara and leather
- Usable on the “Chaise A”, the “Fauteuil A56” and the “Fauteuil A97”.
- Convenient also on perforated versions.
