

Galettes^{*} Stamskin[®] et Alcantara[®] chaises A / Fauteuils A56

Designed by Tolix[®]

Cushions for chairs and armchairs stay perfectly in place thanks to their black anti-slip underside. A technical composite material, Stamskin[®] offers exceptional resistance to all sources of deterioration: abrasion, rips, fire (M1 classification for PRN 92-507 standard), water, UV and even sunscreen thanks to its elastomer technology. It doesn't absorb heat and is always at a perfectly comfortable temperature. Alcantara[®] resists both UV rays and water and is soft to the touch, similar to suede.

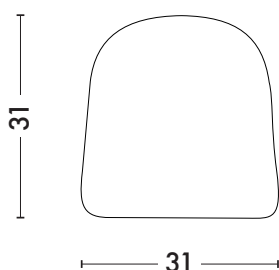

- Available in 2 fabrics: Stamskin[®] or Alcantara[®]
- Usable on the A chair and A56 armchair
