

Classeur à clapets*

Designed by Xavier Pauchard

*Flap Cabinets

Designed by Xavier Pauchard in the 1930s for both industrial use as well as for public and private organizations, the Flap Cabinet has travelled through the years and fashions and is now a classic firmly etched in collective memory. Timeless, it has been readily accepted into the private sphere while retaining its status as an icon of industrial esthetics. Embodying style from the 1930s through to the 1950s, this piece of furniture is robustly solid while also being very lightweight. Highly functional, it has three, five, seven or ten flap-covered shelves depending on the model chosen. Flaps open up 180 degrees and are drawn closed with magnets.

The three-flap CC3 model comes with removable wheels.

Available in all the colors and finishes of the ESSENTIELS, TENDANCES and BRUT VERNIS color palettes, dress up the flap cabinet as you please: order the skeleton and each of the flaps in as many different colors.

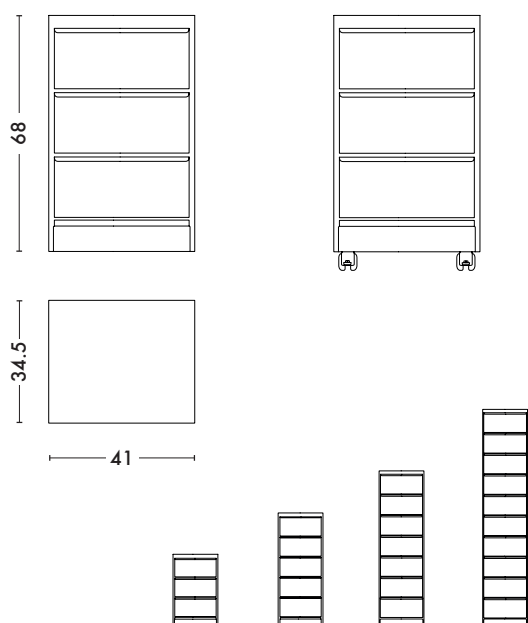

- Available in the color charts ESSENTIELS, TENDANCES and BRUT VERNIS
- Exist in 4 different heights
