

Chaise T14 pieds bois *

Designed by Patrick Norguet

*T14 chair with wooden legs

Conceived by Patrick Norguet, the T14 Chair revolutionized the TOLIX® range. Far from toppling a legend, the T14 started a new chapter.

The T14 Chair's truly modern design introduced innovation into TOLIX®'s manufacturing process in order to provide an exceptional piece. An ergonomic, mono-block design makes sitting extremely comfortable. With the use of wood as a new material, it's possible to create two versions of the chair that have the same type of seat but quite different designs. TOLIX® stays true to its vocation of using noble materials: oak legs for TOLIX® MAISON and Iroko legs for TOLIX® OUTDOOR.

«Two years of discussion, including four intense months of prototyping, made it possible to bring this project to a constructive end. Inheriting from the A model, the T14 stays true to the brand's founding values: simple, functional, comfortable and well made. Designed like a shell, it is built using four assembled parts. The final product is a chair that is robust, rustproof and cut from stainless steel, perfect for outdoor use.»
